**KEEP CALM AND ENJOY COFFEE**

Coffee grown worldwide can trace its heritage back centuries to the ancient coffee forests in Ethiopia. There, legend says the goat keeper Kaldi first discovered the potential of these beloved beans.

The story goes that Kaldi discovered coffee after he noticed that after eating the berries from a certain tree, his goats became so energetic that they did not want to sleep at night. Kaldi reported his findings to the abbot of the local monastery, who made a drink with the berries and found that it kept him alert through the long hours of evening prayer. The abbot shared his discovery with the other monks at the monastery, and knowledge of the energizing berries began to spread.

In the 17th century, coffee had made its way to Europe and became popular across the continent.

Some people reacted to this new beverage with suspicion or fear, calling it the "bitter invention of Satan." The controversy was so great that Pope Clement VIII was asked to intervene. He decided to taste the beverage for himself before making a decision, and found it so satisfying that he gave it papal approval.

Coffee began to replace the common breakfast drink beverages of the time — beer and wine. Those who drank coffee instead of alcohol began the day alert and energized, and not surprisingly, the quality of their work was greatly improved. We like to think of this a precursor to the modern office coffee service.
