OPTION B:  WHY ARE WE SO OBSESSED WITH ZOMBIES?  KEY

1. The zombie concept has Haitian origins, the term nzambi, referring to someone’s ‘soul’. Nowadays, this obsession with the living dead has reached its highest point, as zombies have invaded not only television and films, but also comics and video games. Zombies aren’t sexy — they are quite atrocious and frightening. So, why can’t we look away? Do we love zombies just for pure fun and the rush of feeling scared — or is there something more to this obsession?

It seems that it isn’t just a matter of entertainment. People like monsters because they manifest the things they’re worried about. Of course, zombie narratives are the perfect scenario to represent today’s insecurities about dying, getting sick, the fear of social infrastructures falling apart, etc. This collective nightmare poses the question, “What would you do? Would you survive?” Zombie stories play out this great survival narrative. Still, this brings up another interesting point. If we’re afraid, mortified even, of what the zombie represents, why don’t we run away from it? The reason is that the principle of art is catharsis, which, in short, means that you want to deal with death and infection, but you don’t actually want to go through it. By watching it, you feel horror, anxiety and grief but when the show’s over you happily go back to your life.

Finally, the zombie apocalypse also suggests that people shouldn’t necessarily be afraid of zombies, but of other humans. Can you trust the people that you meet along the way while trying to survive? And if you can’t, what does that say about humanity? The zombie is a metaphor. The real monsters may be us.
